PROJECTS

Blog Site | *HTML, CSS, JavaScript, EJS, Node.js, Express.js, MongoDB, Mongoose*

March 2023

- The application allows users to create, view, and delete blog posts, with each post containing a title and content.
- Developed a dynamic web application for blog enthusiasts that allows them to create, read, and edit posts. Employed CRUD operations and database management to enable users to browse the site, discover existing posts, and access individual posts in detail. The project showcases proficiency in web development and database design.

To-Do List | *HTML, CSS, JavaScript, EJS, Node.js, Express.js, MongoDB, Mongoose, Lodash*

February 2023

- This project is a ToDo list web application that allows users to create and manage their daily tasks.
- I worked on a project to develop a web-based To-Do list application. The aim of the project was to provide users with a platform to manage their daily tasks and keep track of their progress. The application allows users to add, edit, and delete tasks in real-time.

My Portfolio | *JavaScript, React, Tailwind CSS*

July 2023

- Developed a React-based personal portfolio website with Tailwind CSS.
- To enhance networking opportunities, I incorporated contact information and social links, and also ensured a seamless user experience through responsive design and optimized performance.
